BAKER RISK

DID YOU KNOW...

64%[1] OF COMPANIES HAVE EXPERIENCED CYBER ATTACKS

UNIQUE PASSWORDS

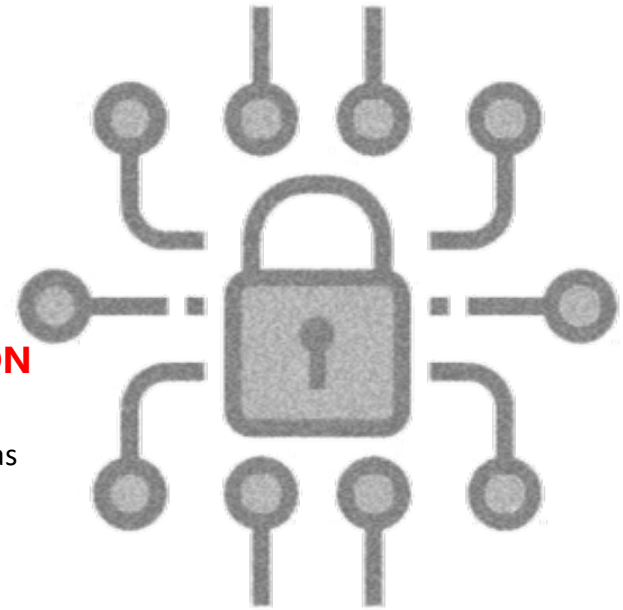
Use strong passwords for all your online accounts. Avoid using common passwords or personal information that can be easily guessed.

TWO-FACTOR AUTHENTICATION

This adds an extra layer of security by requiring a second verification step, such as a code sent to your mobile device, in addition to your password.

CLICKING LINKS

Be cautious when clicking on links or downloading attachments, especially from unknown or suspicious sources.



SOFTWARE UPDATES

Keep your devices and software up to date. Regularly install security updates and patches to protect against known vulnerabilities.

ANTIVIRUS

Use reputable antivirus and firewall software on your devices. Regularly scan your devices for malware and keep your security software updated.

EDUCATION

Educate yourself about common cyber threats and scams, such as phishing emails, social engineering, and identity theft. Stay vigilant about sharing personal information.

1. *How many cyber attacks happen per day in 2023?*. Techjury. (n.d.). https://techjury.net/blog/how-many-cyber-attacks-per-day/#gref
