BAKER RISK

DID YOU KNOW...

IN A FIRE, ROOM TEMPERATURES CAN REACH UP TO 600°F AT EYE LEVEL

Knowing what to do in case of a fire is crucial. Fire is fast, hot, dark, and deadly! Having a plan in place can help reduce the likelihood of injury or death in a fire.

CALL FOR HELP

Get out of danger and call for help. If unable to escape, call 9-1-1 immediately.

MOVE QUICKLY

Fire is unpredictable and can become severe in moments. Leave personal belongings behind and MOVE!

STAY LOW

Drop to the floor and crawl to the exit to avoid dangerous smoke!

STOP, DROP AND ROLL

If your clothes catch fire, remember, Stop, Drop and Roll! Running makes the fire burn faster.
